 **Hotpoint**

Our ideas. Your home.

Quality Time

Finding quality time is at the top of most of our to-do lists. At Hotpoint, we see it as our job to help make your home and kitchen run smoothly. So we've created a range of stylish, multi-tasking and intelligent appliances that give you back the time for the things that matter in your life, your friends, your family - and yourself.

Intelligent Ideas

We've combined advanced intelligent technologies with commonsense and logic to give you the ultimate in useful functionality and performance. We've built in our best ideas to enhance the quality of your home life even further. Ideas like faster programmes, because we know your time is precious, silent operation for a quieter life and smarter programmes to care for every garment perfectly.

Style Statement

Designed to reflect your approach to life, every detail makes a style statement. Smooth clean lines and contemporary finishes combine to brilliant effect, resulting in stunning concepts that look simply sensational. And the beauty of Hotpoint is not just skin deep; every feature has been designed down to the last detail to make our appliances a pleasure to use, with attention paid to the position of every button, the click of every door.

Dependable Back-up

More homes have a Hotpoint appliance than any other brand, so we know how much you trust us and depend on us to keep things running smoothly. At Hotpoint we engineer our appliances to work hard and keep working over and over again and we back this up with the biggest after-sales service operation in Europe to ensure you receive speedy and effective repairs and advice.

Hotpoint recognises that for some family life might not be all that we want it to be. That's why Hotpoint supports ChildLine, the UK's free 24-hour helpline for children and young people.

Contents

Aqualtis

The visionary new Aqualtis washing machines are designed around what you told us you wanted from a washing machine. The Aqualtis not only looks good it has a huge 7.5kg capacity, makes loading easy, has excellent wash performance, specialist wash programmes and superior energy efficiency.

Ultima

Sleek, stylish and packed with innovation, Ultima is the premier choice for those who demand style with substance. Ultima's sophisticated features include Super Silent Wash, interactive LCD and LED displays and the best 'AAA' Wash, Energy and Spin Performance.

Aquarius

Aquarius models are designed around your needs with a host of features including Super Wash, Woolmark Gold Care and Fast Wash cycles to keep you in step with the pace of modern life.

Ranges	4
Colour and Style	6-9
Features	10-15
Washing Machines	16-33
Washer Dryers	34-39
Tumble Dryers	40-49
Jargon Buster	50-51
Specifications	52-54
Customer Care	55
Contact Information	56

Your home reflects your individuality so Hotpoint appliances come in 3 fashionable, hardwearing finishes to fit in to your life as well as your kitchen.

Satin Aluminium

The ultimate in sophistication, this metallic finish is as practical as it is beautiful. It is an ideal alternative to stainless steel, providing a stunning contrast to warm woods and light finishes.

Colour and Style

Polar White

If you change your decorating style as often as your socks, then Polar White is the obvious choice. This cool white gives you all the flexibility in the world and fits in with every kitchen scheme.

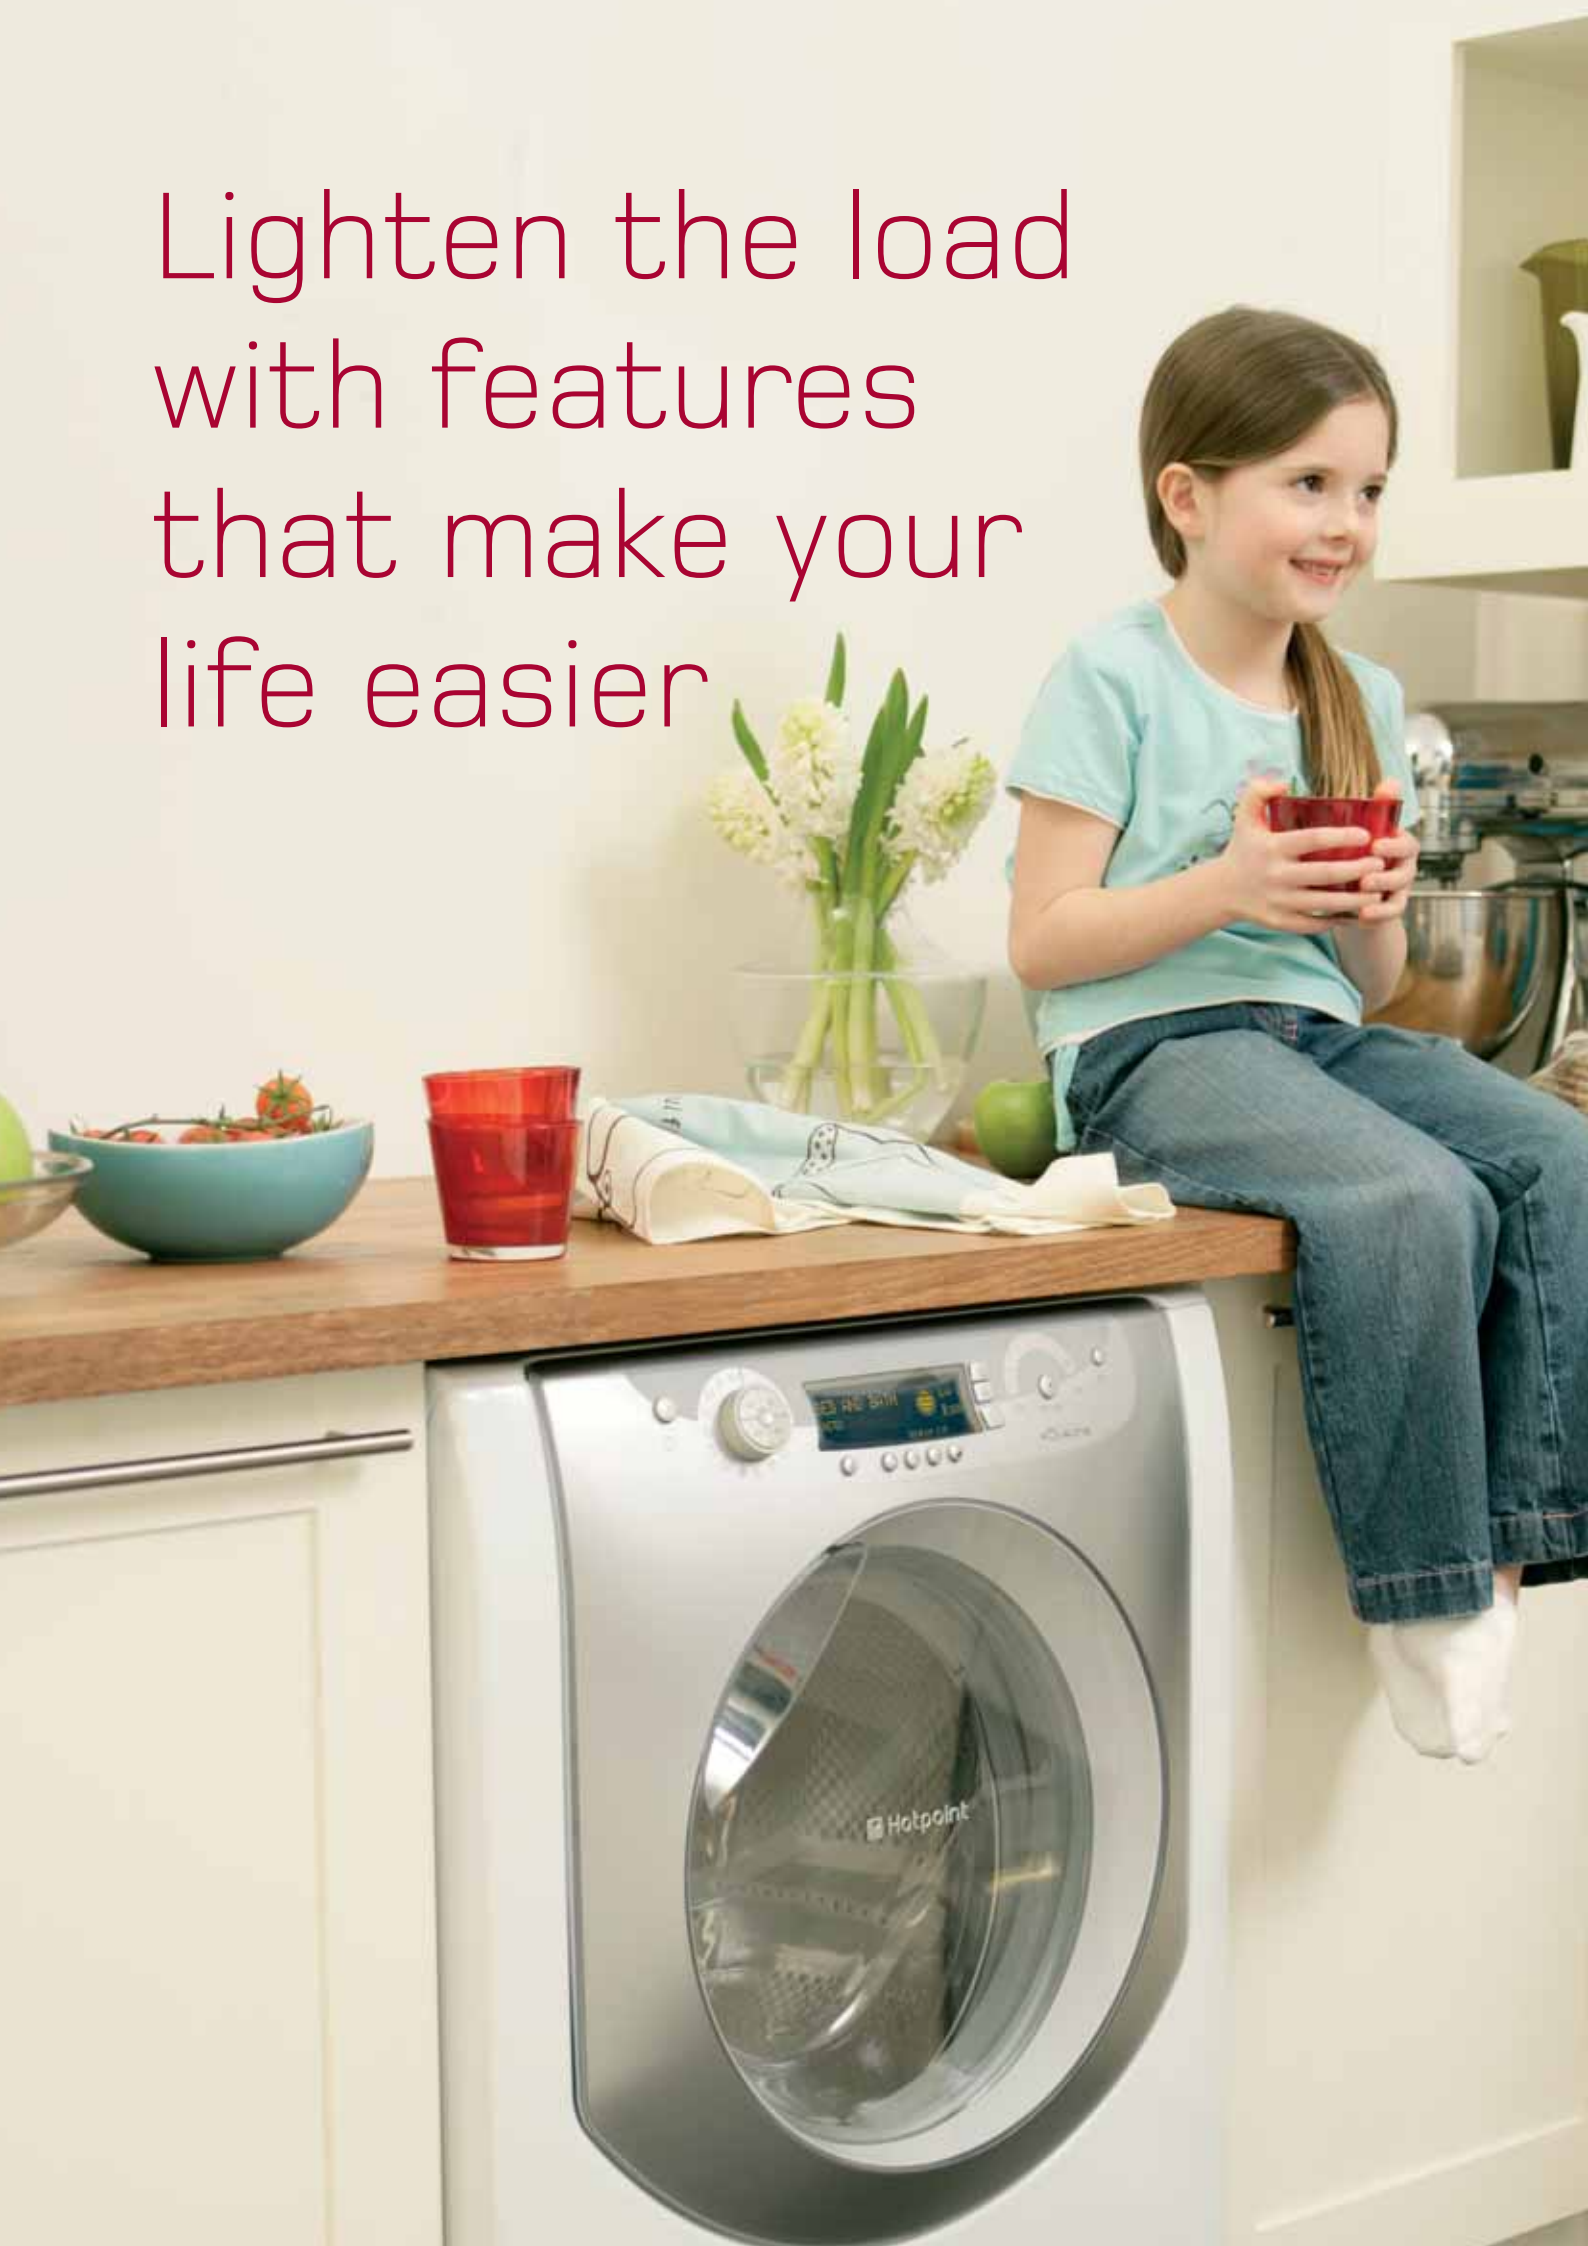

Graphite

This is cutting edge style for the contemporary kitchen. In a busy family kitchen or bachelor pad, this serious design has a sleek metallic finish underlined by contrasting trims.

Lighten the load with features that make your life easier

Big Load Size

Fit it all in a Hotpoint washing machine. Our Aqualtis models take a huge 7.5kg load and our Ultima machines hold a massive 7kg wash load but still fit in a standard kitchen gap.

Ergonomic Design

Taking the backache out of wasday, the Aqualtis models have an extra large door which opens to a higher positioned drum that is tilted at 8° giving you a good view of what's inside. Also the 35cm wide opening, coupled with its higher position, makes loading and unloading a breeze.

Duvet Cycle

Say goodbye to treks to the dry cleaners. Aqualtis models are equipped with a special wash programme for duvets, quilts and padded jackets that has been designed to ensure a deep clean while taking extra care of the padding.

Bed and Bath Cycle

Ever wished you could wash the entire family's bedding and towels in a single load? Aqualtis washing machines will wash a set of bedding for a double bed, two single bed sets and four towels in just under two hours without compromising on wash performance or results.

Super Silent Wash

A Super Silent washing machine gets on with the job so quietly you'll hardly know it's working. Its specialised motor dramatically reduces noise levels during the wash cycle to as low as 47dB.

Woolmark Platinum Care

Endorsed by Woolmark, this programme has extra gentle agitation and low spin speeds to ensure your woollens get the same personal touch as a hand wash.

* In the UK and Eire the Woolmark is a Certification Trade Mark

A+ Energy

The ultimate in efficiency, 'A+' outshines even an 'A' rating. Kinder to the environment and your pocket, our 'A+' rated products use less electricity whilst still delivering top performance.

Super Wash

Delivering a performance that's superior to even 'A' class and with no need for a pre-wash, this super option tackles even the worst case scenario.

Fast Wash Programmes

Keep up to speed with Hotpoint's two fast wash programmes. There's a 30-minute, 30°C cycle for lightly soiled small loads and a 60-minute, 60°C programme for bigger cotton loads.

Cool Wash

Hotpoint's Cool Wash has been specially designed in association with Ariel to care for your clothes and get great wash results at 30°C.

Time Delay

You can't turn back time but you can delay it, by up to 24 hours. Do the washing whenever it suits you - while you're at work, out to dinner or even after you've gone to bed.

Wash Enhance

When you need that little bit extra to get your laundry clean, simply select the Wash Enhance button to increase the intensity of your 40°C or 60°C cotton wash programme.

Variable Temperature and Spin

You can vary the temperature and spin levels at the touch of a button to customise wash programmes to meet the demands of different fabrics, leaving them thoroughly clean and in top condition.

Reduces Creases

Smooth out the wrinkles with this option that reduces both the wash agitation and spin speed, meaning washing comes out with fewer creases to ease your pressing problems.

Mini Load

This option really comes into its own when you only need a couple of items washing. The Mini Load will quickly wash just a few items without wasting time, energy or water.

Wash, spin
energy
AAA

AAA Performance

'AAA' rated washing machines have the best wash, energy and spin performance. These models get your wash cleaner using less electricity and with less water remaining after every spin, cutting drying times too.

Set By How Dirty

Create the perfect programme for your wash. Select from light, normal or heavy soil options to tailor the agitation level and length of cycle to give you the best results.

Child Lock

Once activated the Child Lock prevents even the most inventive and inquisitive little fingers from making any changes to the wash programmes you have set.

Woolmark Gold Care

This Hand Wash Wool programme is endorsed by Woolmark to care for your favourite wool garments.

* In the UK and Eire the Woolmark is a Certification Trade Mark

Aqualtis Washing Machines

The Aqualtis is the washing machine of the future. It not only looks good, it is designed to make life easier with sophisticated functions but simple programming. It offers a huge 7.5kg load capacity with easy loading and unloading but all the time it has an eye on the environment, offering high performance alongside reduced water and power consumption.

Washer Dryers

Have It All

Hotpoint Washer dryers combine all our washing and drying expertise to give you the best results. Including Hotpoint's washing machine features such as Woolmark Gold Care and Super Wash they also have valuable drying features such as Set and Forget Sensor Drying.

Set and forget

Set and Forget Drying

Sensing when the load is dry the programme automatically moves to a final 20-minute cool tumble. Our top end models have Multi-Level Set and Forget so you can choose your level of drying: iron, hanger or cupboard dry.

Wash and dry load

5+5kg

5+5 Wash and Dry Load

No need to hang about waiting for the wash to finish. Hotpoint's resourceful washer dryers take care of everything, washing and drying a 5kg load in a single uninterrupted cycle.

Washer Dryers

The ultimate space saver, Hotpoint washer dryers give you all the flexibility you need from a separate washer and dryer in one convenient package. Designed to wash your laundry with care, Hotpoint washer dryers feature a woolmark Gold Care programme designed for hand wash only woollens. Also with selectable drying levels you can dry your load as carefully as you wash it.

Tumble Dryers

More Than Just Hot Air

Hotpoint's Condenser and Vented tumble dryers do more than just get your clothes dry. With features like Set and Forget Drying and Time Delay, they dry your laundry to the level you want, when you want. Packed full of programmes, there's sure to be one to suit your needs.

Creasecare – Pre and Post Drying

A smooth operator, this programme prevents heavy creases forming by intermittently tumbling the load without heat.

Wool Programme

No need to be timid about machine drying delicate wollens. This extra gentle programme is specifically designed to take care of your finest wool items.

Set and Forget Drying

We take the guesswork out of drying times with a sensor that monitors moisture and temperature levels. When it detects that a load is dry, the programme automatically moves to a final 10-minute cool tumble. Our top end models even have Multi Level Set and Forget Drying where you can choose your level of drying – iron dry, hanger dry or cupboard dry.

Big Loads

Looks can be deceptive. Hotpoint dryers come in standard sizes but they take huge loads. Our Vented Dryers take a big 6kg load and our Condenser Dryers go one further taking a massive 7kg load.

Display

Select your programme using the LCD interface and the display tells you everything you need to know including programme progress, Time Delay, heat setting, fabric type and 'Time to End'.

Condenser Dryers

An ultimate drying convenience, Condenser Dryers don't need a vent hose so they can be placed anywhere in your house. The internal condensing system collects moisture into an easy empty water bottle at the top of the machine. You don't even have to empty the water at all if you use the Mains Drain Option, which comes as standard on all condenser products.

'A' Wash @ 40°C: A 40°C Cotton Wash programme delivering 'A' Wash performance

'AAA' Performance: 'AAA' Performance washers have the best 'A' rated wash, energy and spin performance. These machines are also Energy Efficiency Recommended

Airing Programme: 20 minute cool tumble to refresh the load

Auto Creasecare: Prevents excess creasing on any wash programme by gradually reducing the water temperature towards the end of the cycle

Auto Half Load: Hotpoint's washing machines automatically adjust the water level for any size load to help save time and money when washing smaller loads

Child Lock: Prevents little fingers from altering any options or programmes you have chosen

Bed and Bath Cycle: Hotpoint's Bed and Bath Cycle is a 60°C, high spin speed programme specifically designed for towels and bed linen

Cool Wash: Hotpoint's Cool Wash has been specially designed to care for your clothes and get great wash results at 30°C

Creasecare – Pre and Post Drying: The machine periodically tumbles the load before and after drying to prevent heavy creasing

Delicates Programme (Dryers): A low heat programme tailor made for delicate items

Duvet Cycle: The Duvet Cycle is a 30°C, 1200rpm spin programme specifically for machine washable duvets

Easy Iron: 10 minute programme to relax fibres for easier ironing

Energy Rating: Energy is measured on a scale from 'A' to 'G' with 'A' being the most energy efficient

Energy Save: Reduces the temperature of any programme by 5°C to 10°C to save energy

Extra Rinse: A full 14 litre extra rinse for large wash loads, items for young children or those with sensitive skin

Final Cool Tumble: 20 minute cool tumble at the end of the programme which lowers the temperature of the clothes to a suitable level for handling

Hand Wash: A gentle 25°C, low agitation programme to machine wash 'Hand Wash Only' items

High and Low Heat Settings: A high or low heat setting can be selected on the dryer to suit the load to be dried e.g. Cottons high heat & Acrylics low heat

LCD: Large interface screen gives feedback on the wash or drying programme, what stage it is at, the time left to run, selected programme modifiers and the Time Delay countdown

LED: Displays 'Time to End' and Time Delay countdown

Maximum Detergent Usage: The extra large detergent dispenser with its unique spray system is easy to fill and makes sure the maximum amount of detergent is delivered to the wash

Mini Load Programme: Washes a small load using less water and energy

Out of Balance Protection: Hotpoint's Electronic Out of Balance Protection System ensures the machine does not spin when the load is unbalanced. The machine will try to distribute the load evenly around the drum to minimise vibration and prolong the life of the machine

Programme Progress Indicators: Shows where the machine is in the wash or drying cycle, for example: door locked, prewash, wash, rinse & spin

Reduce Creases: The Reduce Creases option lowers the spin speed to 800rpm so washing comes out with fewer creases

Rinse Hold: Clothes are held in the final rinse water, keeping them fresh until you are ready to complete the programme

Safety Start Button: The dryer will not work unless the start button is pressed, irrespective of whether the door is closed or a programme or time selection has been made

Self Diagnostics LED's: A Self-Diagnostics system tells you, via LED indicators, if you haven't closed the door properly, the load is out of balance or if there is a problem with the water supply

Set and Forget Drying (Single Level): The machine senses when the load is dry and automatically moves to the final cool tumble

Set and Forget Drying (Multi Level): As above but the dryness level of the load can be set as 'Iron Dry', 'Cupboard Dry' or 'Hanger Dry'

Set By How Dirty: By selecting light, normal or heavy soil programme the washer automatically adjusts the agitation level and washing time to suit the load

Spin Performance: Spin Performance is measured on a scale from 'A' to 'G' with 'A' rated machines removing the most water during the spin cycle

Store Favourite Programme: Tailors a programme to suit your individual requirements and stores it as your favourite programme

Super Silent Wash: The specialised induction motor and acoustic absorbing material dramatically reduces noise levels during the wash cycle to as low as 47dB

Super Wash: An intensive wash delivering a superior wash performance compared to the standard 60°C 'A' wash

Time Delay: Allows you to delay the start of the wash or dry programme for up to 24 hours

Time Saver: Reduces wash times by up to 15% on selected programmes

Time to End: A countdown of time remaining in the programme

Top Water Bottle: The Condenser Dryer water bottle is at the top of the dryer for easy access

Variable Spin: The spin speed can be adjusted to suit different fabrics

Variable Temperature: The programme temperature can be lowered to suit different fabrics

Wash Enhance: Wash enhance increases the intensity at 40°C and 60°C cotton washes

Wash Performance: Wash Performance, or how clean the load gets, is measured on a scale from 'A' to 'G' with 'A' being the cleanest

Wool Programme (Dryers): A delicate drying programme suitable for woollens

Woolmark Gold Care – Hand Wash Wool Programme: A Hand Wash Wool programme endorsed by Woolmark to care for your favourite wool garment

Woolmark Platinum Care – Hand Wash Wool Programme: This programme is endorsed by Woolmark. Extra gentle agitation and low spin speeds ensure that wool items get the same personal touch as a hand wash

Hotpoint Stacking Kit

The stacking kit allows you to securely fix your dryer above the washing machine, saving you valuable space. It also has a useful shelf enabling you to transfer laundry from the washing machine into the dryer without having to bend down.

- Easy to pull out shelf with smooth runners
- Shelf holds up to 18kg
- Solid fixing method
- Stylish design, to complement the washing machine and dryer

Stacking Kit Bracket

A bracket solution is also available that provides a solid fixing method between the washer and dryer.

All Stacking Kits are available by calling 08709 066 066 quoting the following part numbers. 1703270 for Hotpoint Vented Dryers, 1703260 for Hotpoint Condenser Dryers and 9090P for the Hotpoint Stacking Kit Shelf. These Stacking Kits can be stacked with any Hotpoint washing machine and new Vented or Condenser Dryer

[‡]ITCL = International Textile Care Labelling standard programmes include 95°C White Cotton & Linen, 60°C Cotton, 50°C Synthetics, 40°C Acrylics, Fast Spin, Slow Spin, Rinse and Spin. *The Energy Labelling regulations only allow a machine to be labelled up to an ‘A’ energy rating based on a standard 60°C Cotton Cycle. However new legislation due to be introduced will allow an ‘A+’ energy rating to be used where applicable. These models comply with this new standard.
[#]Duvet Cycle - max load size 3kg, synthetic, feather (duck and goose down), items, Wash in special bag provided.

†Please note that all graphite appliances do match. However, in certain lights and from different angles, the same colour of adjacent models may appear to differ slightly. On all front loading machines, we recommend a gap of at least 20mm either side of the machine when installed. Always consult handbook for installation details. All optional accessories are available from your retailer or by calling the National Spares number 08709 077 077 or visiting www.hotpointservice.co.uk

Did you know that in Hotpoint Machines Ariel gives you the best washing results?

Certain laundry products work better in some machines than others. At Hotpoint we know this is true because we've done the research to prove it.

We used real, everyday clothes and ran tests to find out which washing powder works best with Hotpoint. The results proved that Ariel produces the best washing results on all your clothes in Hotpoint machines.

Ariel can meet all your laundry needs. Ariel Biological is great for everyday washloads, Ariel Colour & Style helps keep your clothes staying brighter for longer and dermatologically tested Ariel Sensitive has the British Allergy Foundation endorsement for people concerned about sensitive skin.

Add a little Bounce to your Hotpoint Tumble Dryer.

Hotpoint recommend using Bounce in your tumble dryer to help protect your clothes from creasing, static cling and loss of freshness.

Bounce is a fabric conditioner that has been designed especially for your tumble dryer. It comes as a sheet coated with special fabric conditioning and softening ingredients. The combination of the tumble dryer heat and damp clothes release the ingredients from the sheet and the tumbling motion distributes them evenly throughout the load.

Bounce is available in two fragrances, Spring Feeling and Summer Breeze.

Always consult handbook for installation details. For all rear venting tumble dryers a wall (Part No. 9028) or window (Part No. 9029) ventilation kit for permanent installation is available as an optional extra. All Hotpoint Tumble Dryers can be stacked with Hotpoint front loading automatics using a stacking kit. Call Hotpoint spare parts on 08709 077 077 and quote 1703270 for Vented dryers or 1703260 for Condenser dryers. [†]Please note that all Graphite appliances do match. However, in certain lights and from different angles the same colour of adjacent models may appear to differ slightly. Installation Instructions: There should be a 15mm gap either side of the machine and 10mm at the top when installing the machine. In accordance with its policy of progressive product design and environmental protection, the company reserves the right to alter specifications and use quality recycled components. Every attempt has been made to ensure an accurate colour representation of the appliances and features illustrated but due to the limitations of the printing process, there may be some slight variations. Full terms and conditions of our After Sales Care are included in the instruction book enclosed with all our appliances. All offers of guarantees and servicing apply to the UK only. For overseas, please contact you local dealer. Hotpoint®, Ultima®, Aquarius® and First Edition® are trademarks of Indesit Company Ltd.

Our Commitment to Customer Care

Our appliances are designed to help you manage your home. Our customer care is designed to suit the way you live your life.

Call us at your convenience – 364 days a year

We are open when you need us. Our operators are waiting to take your call every day, including weekends, on 08709 066066. Alternatively, book online anytime at www.hotpointservice.co.uk.

Appointments to suit you – not us

We do everything possible to fit in with your busy lifestyle. You can choose between morning or afternoon appointments, with the option of the engineer's first or last visit of the day. Saturday appointments are also available in most areas.

Local engineers – nationwide

We are the largest white goods service team in Europe, offering you access to over 1100 fully qualified engineers on call to ensure you receive fast, reliable, local service.

Professional workmanship – by the experts

All of our engineers are professionally trained at the Hotpoint School of Excellence. Only engineers employed by Hotpoint are qualified to repair your appliance to the highest standards. We fit only genuine replacement parts and guarantee our work for a full 12 months.

Free parts for 5 years – guaranteed

Your Hotpoint appliance is covered for 12 months by a full parts and labour warranty. In addition, by registering with us you qualify for free parts for a further 4 years when fitted by one of our engineers. Labour is charged at a simple flat rate.

Total service cover – for complete peace of mind

We offer a selection of repair protection plans that enable you to fully cover any number of Hotpoint appliances, with new for old replacement in the event they cannot be repaired.

Caring for your Hotpoint appliance – looking good for life

We have developed a range of products that protect and hygienically clean your appliance to keep it looking good and functioning efficiently throughout its life. These can be ordered on 08709 077077.

Satisfaction guaranteed – or your money back

We have a dedicated team who provide free of charge advice and assistance within the first 90 days of ownership to deal with enquiries quickly and efficiently. In the unlikely event that a technical problem occurs that cannot be resolved in this period, we will either replace your appliance or give you your money back.

We're here for you – call us on

08709 066 066
or visit our website www.hotpointservice.co.uk

**Free parts
guarantee**

Need an Answer?

If you have a question about any Hotpoint product, simply pick up the phone. We can give you information about individual models, ranges and specific features. We can even tell you the name of your nearest electrical store.

Our information line is open from 8.30am to 12.30pm and 1.30pm to 5pm Monday to Friday.

08701 50 60 70 or visit
